PROFILE

Architecting offline-first mobile & web apps that power real businesses - from POS systems to globally monetized utility apps.

Leading engineering at PT Poros Digital - scaling Poros POS & Inventory - while exploring AI automation and agentic workflows.

4+ years in tech / 4+ apps published / 4.6 avg. app rating / 40% hardware downtime cut

EXPERIENCE

Founder & Lead Mobile Engineer

Jan 2026 - Present

PT Poros Digital - Blitar, East Java

Founding engineer building Poros POS & Inventory - a full-scale, offline-first B2B retail platform.

- Architected Poros POS (Point of Sale & Inventory), a highly-optimized full-scale B2B application.
- Engineered real-time inventory tracking, complex offline-first capabilities, and reliable SQLite/Room hardware synchronization.
- Integrated deep hardware peripherals, automatic local PDF invoice generation, and automated notifications via the WhatsApp Business API.

React Native / Kotlin / Offline-First / SQLite / n8n / WhatsApp API

React Native & Android Developer (Creator)

Jan 2025 - Present

Independent Global Releases - Remote / Global

Designing, launching, and monetizing consumer utility apps on the Google Play Store.

- Designed and launched Equalizer, a system-level audio enhancement utility monetized globally with AdMob integrations.
- Created MindLog, a mobile diary app with advanced voice-to-text algorithms interacting directly with device hardware and Firebase cloud sync.
- Published Flashlight Pro, an extremely lightweight, hardware-centric utility built on Camera and LED SDKs with near-zero latency.

React Native / Android SDK / Audio APIs / Firebase / AdMob / Speech-to-Text

IT Infrastructure & Hardware Manager

Jun 2021 - Aug 2025

SMA & SMP Budi Luhur - Samarinda, East Kalimantan

Owned technical operations for a school network serving 200+ active daily students and faculty.

- Supervised technical operations, local school servers, network routing infrastructure, and physical workstation maintenance.
- Implemented streamlined systems maintenance procedures, slashing general hardware downtime by over 40%.

IT Infrastructure / Server Management / Network Administration / Hardware Diagnostics

SELECTED PROJECTS

Poros POS & Inventory

2026

Offline-first B2B retail POS platform with real-time inventory tracking, thermal printer integration, and automated WhatsApp invoice dispatch.

- Continuous operation in low-connectivity rural regions
- Automatic thermal printer & PDF invoice sync
- Sub-second automated WhatsApp receipts

React Native / Kotlin / SQLite / n8n / WhatsApp API

Equalizer Sound Utility

2025

System-grade multi-band audio customizer for Android with real-time low-latency DSP, monetized globally via AdMob - rated 4.6+ on Google Play.

- 4.6+ rating on Google Play
- Real-time low-latency DSP rendering
- AdMob banner & interstitial monetization flow

<https://play.google.com/store/apps/dev?id=5627377990901054380> | <https://github.com/amirudinR/ikanequalizer>

Kotlin / Android Audio SDK / AdMob

MindLog AI Diary

2025

Voice-first journaling app with speech-to-text capture, offline logging, and seamless Firebase cross-device sync.

- Voice-to-text with on-device capture
- Automatic entry categorization with offline cache
- Reliable cross-device Firebase sync

<https://play.google.com/store/apps/dev?id=5627377990901054380>

React Native / Voice-to-Text / Firebase

Flashlight Pro Extreme

2025

Latency-free LED utility with a Morse code engine, strobing controls, and zero unnecessary background battery drain.

- Near-zero hardware response latency
- Morse code strobe engine included
- Zero unnecessary background execution

<https://play.google.com/store/apps/dev?id=5627377990901054380>

Android SDK / CameraManager API

9router

2026

Open-source JavaScript project published under the MIT license.

<https://github.com/amirudinR/9router>

JavaScript / Open Source / MIT

Avataraang

2026

Interactive web experience built with JavaScript and deployed on Vercel.

<https://avataraang.vercel.app> | <https://github.com/amirudinR/Avataraang>

JavaScript / Vercel

SKILLS

Mobile:

React Native, Kotlin, Android SDK, Offline-First Architecture, Mobile Hardware Integration

Web:

TypeScript, React.js, JavaScript (ES6+), HTML5 / CSS3, Tailwind CSS

Backend & Cloud:

SQLite & Room, Firebase, Supabase, RESTful APIs, GraphQL

Tools & Workflow:

Git & GitHub, ESLint / Prettier, GitHub Actions, n8n Automation, Figma UI/UX

EDUCATION

Bachelor's Degree (S.Kom) in Informatics Engineering

Aug 2021 - Aug 2025

STMIK Widya Cipta Dharma

GPA 3.54/4.00 - Cum Laude
